

JOHN DOE

Senior Software Engineer

(555) 123-4567 • john.doe@email.com • linkedin.com/in/johndoe • github.com/johndoe • New York, NY

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 8+ years of experience designing, developing, and deploying scalable web applications and microservices. Proven track record of reducing system latency by up to 40% and leading cross-functional teams of 5–10 engineers. Expertise in full-stack development, cloud infrastructure (AWS/GCP), and Agile methodologies. Seeking to leverage technical leadership skills to drive product innovation at a forward-thinking organization.

CORE COMPETENCIES

• Full-Stack Development	• Agile / Scrum Methodology	• Technical Team Leadership
• RESTful API Design	• CI/CD Pipeline Management	• Performance Optimization
• Cloud Architecture (AWS)	• Microservices Architecture	• Database Design & Tuning

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, Java, Go, SQL

Frameworks: React, Node.js, Django, Spring Boot, Express.js, FastAPI

Cloud & DevOps: AWS (EC2, S3, Lambda, RDS), Docker, Kubernetes, Terraform, GitHub Actions

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Tools: Git, JIRA, Confluence, DataDog, New Relic, Figma

PROFESSIONAL EXPERIENCE

Senior Software Engineer | **Tech Solutions Inc.** | New York, NY *Jan 2021 – Present*

- Architected and led development of a microservices platform handling 50M+ daily API requests, improving system reliability to 99.98% uptime.
- Reduced page load time by 42% through implementation of server-side rendering, lazy loading, and CDN optimization strategies.
- Mentored a team of 6 junior and mid-level engineers; introduced code review standards that reduced bug count by 30% over two quarters.
- Designed and deployed AWS Lambda-based data pipeline processing 10TB of data monthly, cutting infrastructure costs by \$45K/year.
- Collaborated with product and design teams in Agile sprints to deliver 3 major feature releases on schedule and under budget.

Software Engineer | **Digital Ventures LLC** | Boston, MA *Jun 2018 – Dec 2020*

- Built RESTful APIs consumed by 200K+ mobile users, achieving response times under 120ms at peak load.
- Migrated legacy monolithic application to containerized microservices using Docker and Kubernetes, reducing deployment time by 65%.
- Implemented OAuth 2.0 and JWT authentication framework, enhancing security posture and reducing unauthorized access incidents by 90%.
- Developed real-time notification system using WebSockets and Redis Pub/Sub, increasing user engagement metrics by 28%.

Junior Software Developer | **StartUp Co.** | Cambridge, MA *Aug 2016 – May 2018*

- Contributed to development of an e-commerce platform generating \$2M+ in annual revenue, focusing on checkout and payments modules.
- Wrote comprehensive unit and integration tests, improving code coverage from 45% to 82% within the first year.
- Optimized SQL queries and introduced database indexing strategies, reducing average query time by 55%.

EDUCATION

Bachelor of Science in Computer Science

May 2016

Massachusetts Institute of Technology (MIT) | Cambridge, MA **GPA: 3.8 / 4.0**

Relevant Coursework: Algorithms & Data Structures, Distributed Systems, Database Management, Computer Networks, Software Engineering

CERTIFICATIONS

AWS Certified Solutions Architect – Professional

Amazon Web Services

Google Cloud Professional Data Engineer

Google Cloud

Certified Kubernetes Administrator (CKA)

Cloud Native Computing Foundation

KEY PROJECTS

OpenMetrics Dashboard | github.com/johndoe/openmetrics

Open-source real-time analytics dashboard built with React, Node.js, and InfluxDB. 1,200+ GitHub stars. Supports live streaming data from Kafka and provides customizable alerting and visualization components.

AutoDeploy CLI | github.com/johndoe/autodeploy

Command-line tool for automated multi-environment deployments using Python and Terraform. Reduces manual deployment steps by 80% and supports rollback strategies across AWS, GCP, and Azure.
